Metal screens

Metal decorative screens have a unique sense of modernity and art, and can be designed, produced and combined according to personal preferences and environmental needs, and the effect is very beautiful.

Outdoor privacy screens are made from metal and are low maintenance and don't require frequent repainting like wooden fences. As the metal panels are pre-rusted and treated with a protective coating to slow the rusting process, the panels slowly continue to rust, gradually changing color and texture.

In addition, we have more surface treatment options, spray paint and powder coating to meet more color needs. Materials are weathering steel, galvanized steel, aluminum and so on as a choice.

metal decorative screen is a high-grade, practical and beautiful decorative material, which is suitable for various public places, commercial places and residential environments.

About the specification:
2*3ft,2*4ft,4*6ft and more custom sizes with 2-4mm thickness material.

METAL PLANTERS

We have more shape options, rectangle, circle, cone, more geometric figures.

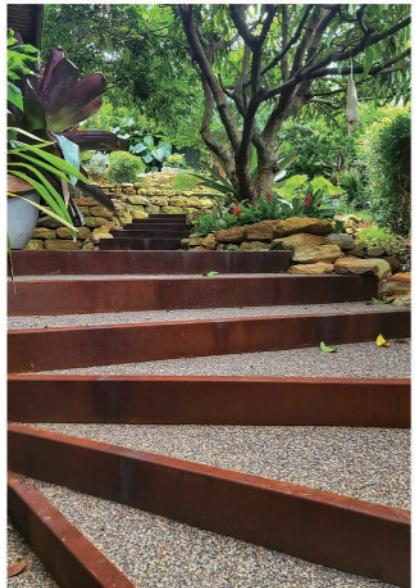

In addition to Corten steel, we also use galvanized steel, stainless steel, aluminum and other metals as materials.

Color can support customization of different colors, such as black, gray, white.

Corten steel planters for outdoor is made of corten steel, which can be used to plant different kinds of flowers. Corten Steel Planter is designed in simple but practical, which is popular in Australia and European countries. Besides, its excellent corrosion resistance can stand the test of time, people do not need to worry about cleaning matter and its lifespan.

LANDSCAPING EDGING IN METAL

This flexible steel garden edging bends to virtually any shape to ensure crisp and clean edges to lawns, drives, paths, flower & vegetable beds.

A brilliant, simple and long lasting way to maintain tidy garden edges, this flexible steel garden edging is easy to install, bends to virtually any shape.

Each strip is galvanized and fully powder coated for long term protection and durability and is available in brown or black. Plain galvanized finish and corten steel pre-rust are also available.

Durable: Made from 1.6 mm gauge galvanized and powder coated mild steel, once installed this edging is maintenance-free and will last for generations.

Versatile: Bends to virtually any shape and suits all soil types.

Unobtrusive: Intended to be mown over, colour are brown or black.

Simple to Install: This garden edging is hammered directly into the ground and easily interlocked with no extra pins, pegs or joiners required.

Landscapers are invited to contact us directly for a quote on large quantities.

Outdoor BBQ Grills & fire pit

The perfect way to add warmth and light for a summer BBQ or a winter get-together, the corten steel fire bowl from Xiaomoke is a great addition to any garden space.

Whether you're looking to create a new garden focal point, or somewhere to bring your friends and family together, the Xiaomoke corten steel fire bowl brings life to the garden - all year round.

- Size: Dia: 80cm Height :80cm
- Fire bowl: 3mm Corten steel Dia 80*H25cm
- Base: 3mm Corten steel 40*40*H55cm
- BBQ grill : 8mm Raw Corten steel Dia 80, middle hole size 35cm;
- Fire bowl and base are separate packing
- NW/GW: 70/75 KGS

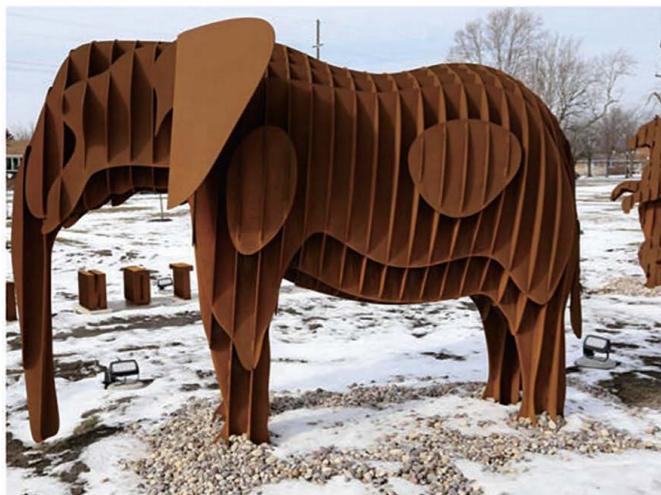

Corten steel is a metallic alloy composed of iron to which copper, phosphorus, silicon, nickel and chromium are added. The strength is comparable to that of other alloyed steels such as stainless steel. Characteristic of Corten steel is the brown rust orange colour and its duration of life. Duration of life is quite long because the first corrosion layer stops any further deterioration by rust. Corten steel BBQ is ideal for the occasional user and for decorative element in the garden.

When first using this Corten steel BBQ with griddle and grill, it is very important that you start with a small fire and after 25 minutes continue to heat up the fire. The heavy Griddle will get hotter on the bottom than on the top. This temperature difference will make the plate hollow. After the first use, the baking sheet has "sat down" and this procedure is no longer needed.

The cooking unit will function best if it has been used once or twice and the oil in the plate has burned. Cooking on the baking sheet will be easier after this 'burn-in' and protects the plate from rusting when not in use.

LIGHTING ART & OTHER LANDSCAPING SCULPTURES

Praised by architects and green space planners, Corten steel enables a wide range of modern, original and ultra-resistant projects to be carried out. Whatever the object, it is carefully laser cut which makes its silhouette very precise and visually harmonious. Apart from the creation of various sculptures such as animals, flowers, arabesques etc., we see more and more large pieces in Corten steel appearing as screens, planters, spheres, house exterior wall and even life-size sculptures. So, it turns out that the Corten steel garden decoration offers a superb variety in terms of designs, formats and colors. The color of this type of steel changes during corrosion stabilization. From a subtle orange color, through various shades of brown, to a dark brown - the famous rusty steel blends harmoniously into any environment.

>> Corten steel sculpture is a new material for modern large outdoor sculptures. Such a special sculpture could attract your attention anywhere.
>> Compared with other metal materials like stainless steel and bronze, corten steel has a longer service life since there is a special rust layer on the surface, and could resist erosion outdoors for a long period.
>> Such special Corten steel sculpture could be placed in many places like public parks, large outdoor squares, and art galleries.
